

# LumiTop AR/VR Near-Eye-Display Testing

## Unrivaled 2D Color Accuracy

- » 2D spectrally enhanced measurement with human-eye-inspired periscope lens
- » Characterization of Near-Eye-Displays (NED) in AR- and VR-headsets
- » Large distortion corrected field of view (H 122° x V 87°) and variable pupil sizes
- » Adjustable focus distance for multiple test applications
- » Flicker
- » Quality control of AR/VR displays for homogeneity, contrast, angle dependency, color fidelity
