

Press Release

Kimsoptec renames to Instrument Systems Korea

After being acquired by Instrument Systems in 2022, the Korean manufacturer of display measurement systems changed its name to Instrument Systems Korea.

Munich, April 2023 – *After acquiring Kimsoptec Co. Ltd. by Instrument Systems in August 2022 and the successful integration into the group, the Korean manufacturer of display measurement systems will trade as Instrument Systems Korea Co. Ltd. from now on. CEO is Dr. Markus Ehbrecht, CEO of Instrument Systems since 2014. He is supported by Managing Directors Dr. Jin Sung Kim, founder and former owner of Kimsoptec, and Jürgen Tiepermann, CFO of Instrument Systems. With currently 44 employees, Instrument Systems Korea will continue to produce and sell its own products under the name Kimsoptec Line. A close cooperation with Instrument Systems is planned in the areas of sales, service and development.*

Founded in 2005, Instrument Systems Korea, formerly Kimsoptec, is today the partner of choice to consult in the field of optical display measurement systems in Korea. The company successfully supplies display test systems to many important Korean display manufacturers and system integrators. Instrument Systems Korea distributes and services the complete Instrument Systems portfolio, providing respective technical consultation. With 44 employees (as of March 2023), it has strong engineering capabilities and operates a manufacturing site for products and systems in the field of light measurement technology, supplementing the Instrument Systems product portfolio. Through its sales channels, Instrument Systems Korea successfully addresses system integrators and manufacturers within the supply chain of the big players in the ICT market and also major key accounts of Instrument Systems.

Company profile of Instrument Systems GmbH

Instrument Systems GmbH, founded in Munich in 1986, develops, manufactures and markets all-in-one solutions for light measurement applications. Its core products are array spectrometers and imaging colorimeters. The company's main fields of activity are LED/SSL and display metrology, spectral radiometry and photometry, as well as laser/VCSEL characterization where today Instrument Systems is one of the world's leading manufacturers. The Optronik line of products for the automotive industry and traffic technology is developed and marketed at its Berlin facility. Instrument Systems has been a wholly-owned subsidiary of the Konica Minolta Group since 2012.
